PINK PROFESSIONAL WAX HEATER 800 ML

EN Instructions Manual

PINK PROFESSIONAL WAX HEATER 800 ML

INTRODUCTION

The PINK Professional Wax Heater 800 ml is a professional heating appliance, ideal for heating all types of depilatory waxes and sugar pastes. We have paid particular attention to the safety of our appliance, which complies with all relevant European standards.

CAUTION: This appliance can be heated to very high temperatures. In order to prevent injury, please read these instructions carefully before using the appliance for the first time.

HIGHLIGHTS

- Removable aluminium insert with metal hook for easy removal
- The appliance can be used with or without the aluminium bucket
- Heating process can be accelerated by pouring depilatory wax directly into the heater (without the aluminium bucket)
- Easy-to-operate temperature dial on the front of the appliance
- Easy to clean

SAFETY GUIDELINES

- Never leave the heater switched on when empty
- Never leave the heater switched on overnight
- If the already liquid wax is boiled in the heater for more than 15 minutes at the highest temperature setting, it can cause a damage to the heater. This is not covered by the warranty.
- When hot, do not touch the depilatory product, the aluminium on the heater, or the aluminium insert (risk of burns!)
- Keep out of reach of children
- If the appliance malfunctions during the heating process, unplug immediately, and contact PINK Cosmetics GmbH
- Never open the appliance yourself - risk of electric shocks. Only authorised technical personnel from PINK Cosmetics GmbH may access the parts inside the appliance. For repairs or further information, you must contact PINK Cosmetics GmbH.
- Never use the heater if the plug or power cable are damaged, if you notice the appliance is not functioning properly, if the appliance was dropped and/or damaged, or if the appliance has come into contact with water
- Always allow the appliance to cool down completely before storing

INSTALLATION

Open the top of the box and remove the appliance. It is recommended that you keep the original packaging in case you need to return the appliance in the future. The installation site should have a smooth, flat, solid surface. Direct sunlight and exposure to a dusty environment must be avoided. The mains power supply must comply with legal requirements and be suitable for the appliance.

CAUTION: Do not use the appliance near water or in damp areas.

INSTRUCTIONS FOR USE

1. Pour the depilatory product directly into the heater, or into the aluminium bucket. (Note: when using the removable aluminium bucket, heating the product will take slightly longer)
2. Switch on the appliance, and set the temperature gauge to the highest setting for approx. 15 min.

(depending on the the room temperature as well as quantity and consistency of the depilatory product)

3. Adjust the temperature to the setting recommended for the depilatory product e.g.
 - Next Generation Wax: setting 4 – 5
 - StripAway Wax: approx. setting 5
 - PINK Sugar Paste: setting 3 – 4

Please note: The settings and times given are approximate values for around 200 g of product (heater approx. half-full) and without the aluminium bucket. These values may vary depending on the room temperature, the consistency of the depilatory product, and the fullness of the container. Before applying the depilatory product to the customer, we recommend that you test the product on the side of your wrist to ensure that it is at a safe and comfortable temperature.

CLEANING

After use, clean the heating appliance with a special cleaner/wax remover e.g. PINK Wax Solvent. Wax residues are easy to remove from the surface of the heater while the appliance is still warm. Make sure you have unplugged the appliance before cleaning. PLEASE NOTE: Use only cleaning products designed to remove wax.

TECHNICAL SPECIFICATIONS

- 220 – 240 V, 50 Hz
- 200 watt
- Maximum temperature: 105 °C
- Aluminium tank
- ABS plastic housing
- Capacity: 800 ml
